

Please do not limit what satellite radio can broadcast to me. I live just outside of Minneapolis, and continually use my XM satellite radio to monitor weather and traffic. By restricting them you are restricting the personal choice of each listener. I thought you regulated to prevent unlawful content, not to put money into the pockets of the large broadcast companies. It is as if free speech in this country, under this administration is becoming a crime. Will you next limit which religions can broadcast on the airways?
